specialty aviation chemicals

- DICE Fuel Additive
- Biobor Fuel Additive
- TKS Wing Deicer
- Safe Temp Wing Deicer

Aviation Laboratories' Chem Product Group includes specialty aviation chemicals AVL DICE Flash 190, AVL TKS, SafeTemp Wing Deicer and Biobor. A company of high standards, Aviation Laboratories only selects and provides high performing, quality products designed to exceed the specific needs of its customers. AvLab's production processes include strict quality control to ensure product integrity.

The Chem Product Group is supported by a team of experts, dedicated to supplying customers with aviation chemical products at an affordable cost, in a variety of convenient packaging options and as quickly as possible. With dozens of stocking locations across the country, AvLab is able to offer fast product delivery, even to remote areas.

Track Kits. Shop Products. Get Results.

DICE Fuel Additive, TKS Fluid & Wing Deicers

DICE Flash 190 FSII Fuel System Icing Inhibitor

DICE Flash 190 is now the preferred fuel system icing inhibitor in General Aviation. Our product, offered since 1987, is manufactured for us by DOW Chemical Company here in the United States and meets MIL-DTL-85470B. DICE is available in 55 gallon drums, 5 gallon pails, totes, and 20 oz. aerosol cans. DICE undergoes strict quality control and product stewardship.

Part Numbers: D-F190
DICE is stocked in 55 gal drums, 5 gal pails, 20 oz. cans, case of 24
Quote required for bulk and truckload orders.

TKS Fluid -- InFlight Wing Deicer

AVL TKS Fluid is approved by British Aerospace and meets DTD-406B and AMS 1424B. This product is tested before and after blending, and undergoes strict quality control. Approved for all TKS systems. Filtered to 1 micron. Product supplied with certificate of analysis and strict lot control.

Part Numbers:
AVL-TKS-55 (55 gal drum)
AVL-TKS2.5 (Case of two 2.5 gal containers)
AVL-TKS-30 (30 gal drum)

Biobor JF - Biocides for Fuel Treatment

Biobor JF is a liquid fuel additive that combats fungus and other microbial life in hydrocarbon fuels. Biobor JF eliminates growth of harmful slime producing fungi that clog filters and fuel lines, attack rubber fuel system components, and whose waste products aid in the corrosion of metal surfaces. Biobor JF does not adversely affect fuel performance in engines.

Biobor is stocked in pints, quarts, 5 gallons and drums.

SafeTemp Wing Deicer

SafeTemp is the premium PG based deicing fluid. Type I meets all current SAE/AMS 1424B specifications and Type IV meets all current SAE/AMS 1428 specifications. SafeTemp is used by the U.S. Department of Defense and is approved by all major airlines.

Part Numbers:
SafeTemp1-PG100
AVL-Safetemp-IV

Des Case Drum Drier

Des Case standard desiccant breather is a unique, patented air filter and water vapor removal system. It will virtually eliminate breather cap moisture and particulate contamination in industrial equipment reservoirs such as hydraulic tanks and gear boxes.

Part Number: DC-2

Dessicant Cylinder (Driers)

D-5P - (4 Pack)

Desiccant dryers are used for drying air in storage tanks or pneumatic systems and are beneficial in the drying of hygroscopic (water-absorbing) resins. These dryers remove water from the air by passing it through a desiccant that absorbs moisture.

Part Number: D-881142
